

Massimiliano Antonini

graduated in Chemical Engineering at Politecnico di Torino (Italy) in 1996. He is CEO/President and co-founder of Hysytech srl, based in Torino (IT) since 2003 and General manager of Stirling Cryogenics B.V., based in Eindhoven (NL) since 2018. Mr. Antonini has previous work experience as Production Manager in manufacturing companies and he was a freelance researcher at the Chemical engineering and Material Science Department of Politecnico di Torino. He is author of several patents on methods to build fuel cells components, hydrocarbons reforming, fuel processing and special gas treatments. He has been scientifically involved in several EU R&D projects since 1997.
