

Agustina Asenjo received her PhD degree in Physics in 1997 from the University Autónoma de Madrid. She moved to the Institute of Applied Magnetism (UCM-RENFE) in 1998 as a postdoc and in 2000 she worked as an assistant professor in the Faculty of Physics of the University Complutense of Madrid. In 2003 she joins the Institute of Materials Science of Madrid (CSIC) as a Tenured Track and in 2007 she obtains a permanent position as Tenured Scientist. From February 2016 she is Senior Researcher of the ICMM-CSIC. Her current research interests are the development of Magnetic Force Microscopy (MFM) techniques and the study of Magnetization Reversal Processes in magnetic nanostructures. She leads a number of national projects and she has published 100 papers in international journals (80% of them in Q1).
