

Elia Bari - CV

Dr Elia Bari graduated in Pharmacy with honours in July 2016 at the University of Pavia, and in November of the same year, he is the winner of a ministerial scholarship for the doctorate in Chemical and Pharmaceutical Sciences at the University of Pavia. He discussed his PhD thesis on February 2020, and since October 2019 he holds a post-doc position at the Department of Drug Sciences at the University of Pavia. His research activity is in the field of advanced therapies and regenerative medicine, with particular emphasis on the secretome and extracellular vesicles released by Mesenchymal Stem Cells and the ways to formulate them into a new medicinal product.
