

Manager and Technical Responsible at national level of the Global Investments Innovation Incentives (Gi3) team of STS Deloitte. Graduated in Biotechnology, with PhD in Industrial Biotechnology, she gained a long experience in research, development and innovation in international research institutes, including ENEA (IT); University of Barcelona (ES) and Novozymes A/S (DK). Her scientific expertise covers several fields including the industrialization of chemical processes, microbial biotechnology and bioenergies. In her previous work experience, she acquired a deep knowledge in European Grants for R&D projects, as well as in national and regional research and development funding programs. Currently, she deals with the structuring and management of large R&D&I projects and she supports companies (Large enterprises and SMEs) in optimizing new investment programs for obtaining R&D&I incentives and grants (i.e. Industry 4.0 package; Innovation Agreements; H2020; LIFE Program, etc.).
