

Mariam Hassan, PhD-student in Industrial Engineering, Curriculum: Material Engineering of the SIMAU Department in the Politecnica University of Ancona (Italy). Her PhD title is “Synthetic antiferromagnets for biomedical and flexible spintronic applications”. Her research activity is related to the study of Co/Pd and Co/Ni-based multilayered magnetic thin films prepared by DC sputtering and she is supervised by Prof. Gianni Barucca and Dr. Gaspare Varvaro. She has work experience in the Nanostructured Magnetic Material Lab (CNR-Rome). In 2017, during her Masters thesis, she worked on the characterization of $\text{Ge}_{15}\text{Sb}_{85}$ phase change material grown by pulsed laser deposition and her thesis Title was “Physical Properties of $\text{Ge}_{15}\text{Sb}_{85}$ Thin Films Prepared by Pulsed Laser Deposition”. The results of her research were published in 3 papers and she has contributions to more 10 conferences and schools of magnetism (h-index: 1 - Google Scholar).
