

Graduated in Physics on October 2017 at Sapienza University of Rome. From November 2017 is attending a PhD in Materials Engineering at Sapienza University of Rome. Her research topic is the development of Si based anodes for advanced Li-ion batteries. Her PhD project is a joint project with ENEA Casaccia and ENEA Frascati Research Centers. From May 2019 she is joining the Nanotechnology Research Group at the Bernal Institute of the University of Limerick (Ireland).
