

Matteo Rinaldi is a researcher at the Institute of Atmospheric Sciences and Climate (ISAC) of the National Research Council (CNR), in Bologna (Italy). His research interests are in aerosol composition, atmospheric aerosol sources and aerosol evolution processes in the troposphere. He has extensive expertise in the size segregated sampling and chemical characterization of atmospheric particulate matter, both in polluted and remote environments. He co-authored more than 50 peer-reviewed scientific articles (h index 24; ISI Web of Science).
