Dr. Tirelli currently supports the activities of cytometry area of ISS Core Facilities as flow cytometry and sorting expert.

Since 2008, she collaborates in different projects that allowed her to acquire an excellent experience and high skills in cytofluorimetric analysis and cell sorting, working specifically with the FACS Aria sorter of BD Biosciences and Gallios, Cytotflex LX and MoFlow Astrios cell sorter of Beckman Coulter.

She has a strong experience in haematology and stem cells differentiation. She, at present, collaborates with numerous researchers of the ISS actively contributing to the development of experimental strategies in different areas of scientific research. In addition, she is committed to developing new unconventional flow cytometric strategies.
